Name- Suraj Sawant

Roll No- TEB38

1. Use the inbuilt dataset 'titanic' as used in the above problem. Plot a box plot for distribution of age with respect to each gender along with the information about whether they survived or not. (Column names : 'sex' and 'age')
2. Write observations on the inference from the above statistics.

```
import pandas as pd
import seaborn as sns
import matplotlib.pyplot as plt
```

```
df=sns.load_dataset("titanic")
df
